Title: Low Level Laser (Lll) in Dentistry

Vitor Hugo Panhóca

Department of Physics and Material Science, University of São Paulo, Brazil

The red and infrared LED therapy can be useful in improving the processes relating to pain relief and range of jaw movement results in patients with Temporo-Mandibular Disorder (TMD). LED therapy and Low Level Laser (LLL) has shown similar results in photobiostimulation. In this context, the LEDs may be regarded as an attractive alternative to the use of Low-Level Laser (LLL).
