**Figure 1:** Buschke lowenstein tumor in a female.

### Clinical Image

Buschke lowenstein tumors also called giant condyloma acuminatum, is a rare sexually transmitted disease. Men are the most affected. A 28-year-old women, pregnant in 33 weeks came had a 15 cm an exophytic, ulcerative and cauliflower-shaped tumor on the perineal area evolving since only one month (Figure 1). It was not obstructive. A biopsy confirmed bushke lowenstein disease. The patient was referred to plastic surgery department after giving birth to a surgical treatment.
